## From Wheel Chair to Triathlon, how Electro-Therapy Medicine Transformed One Mans Life

*Sports Rehabilitation and Pain Management Systems  
Treatment, Training and Equipment  
Relieves Swelling, Inflammation and Pain and Increases Range of Motion Quickly*

25 years ago John Thorp, a successful stuntman- for shows such as Hawaii Five-O and Magnum P.I. shattered all the bones in his right leg and was told he would require a total knee replacement if he was to ever walk without the use of a cane. He decided against the surgery and was successfully treated using the Electro-Acuscope and Myopulse. Today, he not only walks but runs pain free, his leg completely rehabilitated.

## Equine Therapy For The 21st Century

Sports Rehabilitation and Pain Management Systems  
Treatment, Training and Equipment  
Relieves Swelling, Inflammation and Pain and Increases Range of Motion Quickly

**Thorp Institute Equine Protocols have tremendous success with equine health and horse therapy. Trainers and owners alike depend on the most effective and safest treatments available in order to maintain optimal health and performance in their horses.**

### Testimonials

*"I have been involved with the Acuscope and Myopulse for over 20 years for use in chronic pain for injuries on horses in the Equine Industry and am also a licensed esthetician and use it in the beauty care industry as well. I have been trained by several other distributors over the past 20 years. I learned more in one week training at Thorp Institute than I did from all the combined trainings."*

Don Hoffman, Equine Stud Farm Manager

*"I treated a cutting horse which pulled the suspensories in both a front and rear leg weeks before the futurity. The mare won Open Reserve Champion at the Fort Worth NCHA Cutting Futurity out of over 600 horses, earning a check for over \$140,000."*

Teri Capaldi has been involved with horses for over 30 years. Her specialty is breeding and showing cutting horses. She is a native Californian and works in both the Los Angeles and Paso Robles areas.

### Case Study Photos

The photo on the left shows a huge open wound on a 3 year old mare's chest/shoulder area. Wound is one day old before treatment. Photo on the right side was shot after one Electro-Acuscope and Myopluse therapy session.

If you are interested in purchasing equipment and training and/or becoming a sales representative for Thorp Institute, please contact our marketing team for the details at [info1@thorpinstitute.com](mailto:info1@thorpinstitute.com). We look forward to working with you soon.
